

Happenings

During Term 1

Math→ A main focus in Math is to develop an understanding of the order of operations as well as an introduction to algebra, the area of circles and trapezoids, and finally the views and angles of geometric shapes.

Science→ Students will be busy conducting hands-on investigations as they examine structures for strength and stability.

History→ A look at the events that started Canada on the road toward Confederation is our first topic of the year.

Reading→ Students start the term by reading the classic, The Outsiders, followed by some new and very interesting literacy units.

Writing→ The class emphasis is to become aware of the seven traits needed to ensure good writing.

Art→ The element of line is our focus during the term which includes a charcoal sketch.

Phys Ed→ A vigorous effort is required by students as they participate in soccer, football, running, and volleyball.

Music→ Proper technique and correct fingering will be the focus as well as working with notation.

Geography→ The class will examine the reasons and consequences that people have for moving as we look at migration.
